General Assembly
2015

JENNIFER YIEN

ENGINEERING MANAGER

PROFILE

What you build is only as good as the experience you design. I'm always looking for ways to better myself. My passion for learning and creating things is an essential part of my growth.

My experiences have played a critical role in the way I approach software engineering today. As a former designer and high school educator, I taught children about the intersection of design and technology.

WORK EXPERIENCE

ENGINEERING MANAGER
Justworks / 2022 – present

- Guides career growth through goals, coaching, and technical support
- Collaboration with the stakeholders to set project expectations, manage OKRs, product roadmap, and work on agile processes to develop alignment

SOFTWARE ENGINEER
Justworks / 2020 – 2022

- Scrum Master for Team on various projects
- Lead User Acceptance testing and manage ticket creation
- Collaborated and built the curriculum for Engineering Apprenticeship program

SOFTWARE ENGINEER
WeWork / 2018 – present

- Led engineering design for event feedback project deployed globally
- Collaborated with iOS team on backend implementation and testing
- Performed API upgrades for improved error handling
